### ■ Synopsis

Anyone interested in crafts who strives to have a well-designed home will adore this book. Readers will gain the insight to create masterfully coordinated rooms with the designer inspired look, without the designer price tag. With the help of "Designer Home Sewing" and their sewing machine, readers will be directed to follow simple sewing instructions to complete a look that flows through coordinating colour, fabric, and design. Readers are taught to create professional looking valances, throw pillows, curtains, slip covers, and more. Rooms will no longer be a decorating mish-mash, but a tastefully decorated space with personal flair that echoes throughout.
