■ Synopsis:

Children's bedrooms have during a long time been left aside of the tendencies and decoration. But children are now at the centre of designers, stylists and decorators' concerns! This new Deco Book is the perfect guide to learn how to ally colours, furnitures, bed linens, and objects made only for children. The purpose of this book is to create a bedroom that is a real space for children, exclusively for them. A space that would be practical, playful and nice. Trendy decoration styles are presented, from contemporary to vintage, passing by classical on the way.

■ What is there to learn?

Ingenious arrangements to gain space, tips to have a nice and convenient room for two children, or to receive without problem a whole tribe of friends! A part of this title also focuses on solutions to store toys, books and clothes nicely.
