- ISBN : 978-2-70720-899-6

■ Synopsis:

Renovating allows the proprietor the opportunity to adapt a place to needs of a more modern living style. Successfully transformed and renovated, a house gains in longevity, in comfort and in charm. This book presents varied projects of renovation, for all tastes.

Throughout around ten realisations, the author shows us the diversity of possibilities for renovation and transformation of a house. Readers will find for example explanations about renovation of an ancient house, about volumes restructuration or on lowering energy consumption.

■ The Author:

DPLG architect, Marie-Pierre Dubois-Petroff shares her time between her job and the books she writes about housing. She is the main author in our « Architect's Tips series », and is the author of *Petits espaces grandes idées / Small Spaces Big Ideas*, recently reprinted (2014).
